

# Karan Rawat

Web Developer

## PROFILE

Fresher web developer with expertise in HTML, CSS, JavaScript, Bootstrap, React, and Redux. Skilled in creating responsive and user-friendly web applications that deliver the optimal user experience. Adept at developing custom websites and integrating various APIs. Strong problem-solving skills and a passion for staying current with emerging trends and technologies.

## PROJECTS

February 2023 – February 2023

### IMDB CLONE

I built a front-end version of the IMDb website using React.js and The Movie DB API. This project helped me demonstrate my proficiency in React.js and API integration while creating an application that provides value to movie enthusiasts

February 2023 – February 2023

### ECOMMERCE APP

I built an E-commerce app using React.js and an API integration that allows users to browse and purchase products from various categories while creating an application that provides value to shoppers.

February 2023 – February 2023

### PORTFOLIO WEBSITE

The Personal Portfolio Website is a web application created with React JS that highlights my web development abilities, knowledge, and successes. The website has an introduction, projects, skills, and contact information section for introduction, projects, talents, and contact information.

February 2023 – February 2023

### WEATHER APP

I have developed a weather app using React.js from scratch. I integrated the Open-Weather-Map API to fetch the weather data. To make the app more user-friendly, I included a search bar where users can search for weather information for any city.
